

# We are looking for: PHP Developer (m\*f)

**kraftwerk** is Austria's #1 creative agency with digital focus. kraftwerk International – founded in 2011 – in Niš, is a branch of the international advertising agency with it's headquarter in Vienna, Austria. We create solutions for medium and large companies and help them take the next step into digital age. We do this as a team of more than 50 experts.

## What you offer

- You have 2+ years of professional experience in creating web-based applications written in PHP (contracting or freelancing are acknowledged)
- You are proficient with object-oriented software design patterns and concepts
- You have professional backend development experience with CMS solutions like TYPO3 or Drupal
- You know your way around at least one PHP framework like Symfony, Laravel or Codeigniter
- You have experience in creating and working with RESTful web services
- You have solid understanding of HTML5 and JS
- You are used to maintaining your code with source control tools like GIT
- You are fluent in English and you have no problem to communicate with your colleagues, work in a team and propose and discuss new ideas
- You are a passionate person and have a keen eye for clean code, usage of software design patterns and best practices

## What we offer

- A flat hierarchy in a friendly and flexible work environment
- Long-term potential to put your talents into practice
- A young and qualified team of experts
- Flexibility in contracts after one year
- A competitive salary, teamevents, German classes
- Permanent employment
- Private health insurance
